

Curriculum Vitae of Lethabo Anyanwu

AI & Automation Developer | BSc Information Technology graduate

Personal and contact information

Email address : lethaboanyanwu2@gmail.com

Phone numbers: +27659410727

Nationality: South African

Summary

Automation Developer with experience delivering UiPath solutions in enterprise environments across financial services and business operations. Skilled in intelligent automation, process analysis, Power Platform, Python, SQL, and workflow optimisation. Currently developing enterprise automation solutions through Realm Digital for Sanlam while completing my Honours degree in Information Technology. Interested in AI-driven workflows, agentic automation, orchestration, and scalable business automation solutions.

Education

BSc Honours in Information Technology — Richfield Graduate Institute (02/2026 – Present)

BSc in Information Technology: North-West University (02/2022 – 11/2024)

IT system development NQF level 4: SANGE (02/2025 – 02/2026)

Work Experience

AI & Automation Developer contracted to Sanlam (03/2026 - Present)

- Develop enterprise UiPath automations for financial and business operations
- Build attended and unattended RPA solutions using UiPath Orchestrator and REFramework
- Collaborate with stakeholders to analyse processes and identify automation opportunities
- Support testing, deployment, monitoring, debugging, and exception handling
- Work within Agile environments following automation governance and best practices
- Built user front ends and dashboards that are powered by RPA using Microsoft power platform
- Build AI powered processes that streamlined Sanlam's financial processes like general ledger reconciliation and trial balance creation

Automation Solution intern at i1 Solutions (02/2025 – Present)

- Designed and deployed UiPath automation solutions for business process optimisation
- Worked with UiPath Orchestrator, queues, assets, logging, and workflow monitoring
- Applied REFramework standards and supported testing, debugging, and documentation
- Assisted with OCR, document understanding, API integrations, and data extraction workflows
- Collaborated with teams to identify and automate business processes.
- Worked using UiPath Gen AI activities to create a AI powered Candidate screening process

Achievements

- Bronze at BRICS Automation Skills Challenge (2024)
- 1st – Power Platform | 3rd – UiPath Innovation at NWU GeeXpo (2024)
- MTN Business App Academy Graduate (2022)

Technical Skills

- RPA & Automation: RPA Lifecycle, Process analysis, UiPath Orchestrator, Robotic Enterprise Framework, OCR, UiPath APIs and Integration Services, Debugging and Testing, Queue Management, Asset Configuration, Exception Handling and Logging
- Coding languages: C#, C++, VB.NET
- Data Analysis: Power BI, Excel, SQL, Python
- Power Platform: Power Apps, Power Automate, Power BI
- Tools: Microsoft Office Suite, Git, GitHub, Agile/Scrum, CI/CD, REST & SOAP APIs, JSON/XML
- Technical documentation: WBS, PDD, SDD, Testing plans and UAT

Certifications and training

- UiPath Certified Professional – Automation Developer Associate (2025)
- RPA Developer Foundation (UiPath v2021.10)
- UiPath Academy Automation Explorer Training
- Agentic Automation Training
